

Rural Health Strategies for a Value-Based Future

ASHNHA Conference
Anchorage, Alaska
April 22, 2014

ALASKA STATE HOSPITAL &
NURSING HOME ASSOCIATION

A. Clinton MacKinney, MD, MS
Deputy Director and Assistant Professor
RUPRI Center for Rural Health Policy Analysis
University of Iowa | College of Public Health
clint-mackinney@uiowa.edu

Agenda

2

- Rural Health Context
- Transfer of Financial Risk
- Redefine and Redesign
- Toolbox for Value

Clint MacKinney, MD, MS

Agenda

3

- **Rural Health Context**
- Transfer of Financial Risk
- Redefine and Redesign
- Toolbox for Value

Converging Forces

4

- Price reduction threats and volume reduction pressures
- Expanding insurance coverage and changing products
- Continually evolving quality measures and expectations
- Alternative models of care (e.g., telehealth, new providers)
- Local health care collaborations and regional affiliations

Affordable Care Act (and More)

5

- New ACA emphases
 - Insurance coverage
 - Primary care
 - Financing innovation (incremental)
- Major ACA *themes*
 - Demand for health care *value*
 - Transfer of financial risk
 - Collaboration and competition
- Not just the ACA!
 - Macro economic forces will continue to drive health care reform

Clint MacKinney, MD, MS

Quality Linked to Payment

6

Sustainable Growth Rate Fix (proposed)

- Minimal fee-for-service payment increase next 10 years (0.5%, then 0%)
 - Actually payment decrease (inflation)
- Merit-Based Incentive Payment System (-9% to +27%)
 - Likely to include quality, satisfaction, and efficiency measures
 - Eventually replaces PQRS, Meaningful Use, and Value-Based Modifier
- Alternative Payment Models (5%)

Clint MacKinney, MD, MS

Value Equation

7

$$\text{Value} = \frac{\text{Quality} + \text{Experience}}{\text{Cost}}$$

But does our current volume-based payment system impede delivering health care of value?

Clint MacKinney, MD, MS

Tyranny of Fee-for-Service

8

- "Successful" physicians and hospitals seek to maximize:
 - Office visits per day
 - Average daily inpatient census
 - Admission percent from the ER
 - Profitability
- Is this how to identify and reward a great physician or a world-class hospital?
- **No, but what to do?**

Clint MacKinney, MD, MS

The Value Conundrum

9

You can always count on Americans to do the right thing – after they've tried everything else.

- Fee-for-service
- Capitation
- Market
- Single payer

- **What about paying for health care value?**

Clint MacKinney, MD, MS

Form Follows Finance

10

- How we deliver care is predicated on how we are paid for care
- Health care reform is changing both
- Fundamentally, reform involves a **transfer of financial risk** from payers to providers

Clint MacKinney, MD, MS

Agenda

11

- Rural Health Context
- **Transfer of Financial Risk**
- Redefine and Redesign
- Toolbox for Value

Risk Assessment is Ubiquitous

12

- Risk is present when an outcome is uncertain or unpredictable
- Types of health care risk
 - Random
 - Insurance
 - Political
 - Medical Care
- Where/how can hospitals/clinics:
 - Influence or control risk
 - Reduce risk of harm
 - Optimize risk of benefit

The Risk of Inertia

13

Because
we've ALWAYS
done it that way!

Source: Institute for HealthCare Improvement
and Sharon Vitousek, MD

Clint MacKinney, MD, MS

Random

14

- Normal variation
- Rolling the dice
- Roulette v. poker
- No significant control, but important to recognize

Clint MacKinney, MD, MS

Insurance Risk

15

- Insurance risks
 - Demographic change
 - Technological innovations
 - Prior health status
 - Cost inflation
- Cost is the actuarial metric
- Minimal control, but predictable

Political Risk

16

- Rules, regulations, and legislation
- Profound impact on health care delivery and finance
- Modest control, often via advocacy avenues

Medical Care Risk

17

- Medical care *variation*
 - Diagnostic accuracy
 - Care plan implementation
 - Guideline use compliance
 - Pharmaceutical choice
 - Procedural skill
 - Efficient resource use
- Our clinical choices influence health care **value**
- Greatest control, how we deliver care

Rural Risk?

18

Agenda

19

- Rural Health Context
- Transfer of Financial Risk
- **Redefine and Redesign**
- Toolbox for Value

The Volume to Value Gap

20

Volume-based

- Pay-for-service (volumes)
- Cost-based reimbursement
- Hospital/physician independence
- Inpatient focus
- Stand alone care systems
- Illness care

Value-based

- Pay-for-results (quality/efficiency)
- Shared risk
- Partnerships and collaborations
- Continuum of care consideration
- Community health improvement (HIT)
- Wellness care

Volume to Value Transition

21

- Bath water
 - Fee-for-service and CBR
 - Necessary providers (OIG)
 - Few quality demands
 - Inefficiency tolerated
- Turning up the heat
 - Decreased per unit price
 - Pressure to reduce volumes
 - Quality demands
 - Competitive market
- How to avoid getting cooked?

Redefine Our Future

22

- Understand the current rural health care milieu
- Acknowledge the paradox of quality, experience, and cost
- Envision and articulate a **value-based future**
- Lead with focus and clarity, but be willing to listen and learn
- Plan for transition challenges

Redesign our Operations

23

- Organization chart
- Capital budgets
- Job descriptions
- Compensation
- Clinical care sites/modes
- Care coordination
- Provide or partner

Transition Requires New Foci

24

- Inpatient Beds → Clinics (and more)
 - Expanded/robust primary care
 - Workplace nursing and SNF/ALF clinics
 - Mobile clinics and telehealth
- Illness → Wellness
 - Health Risk Assessments
 - Community Health Assessments
 - Health coaching and care coordination
- Charges → Costs
 - Revenue becomes covered lives
 - Charge master becomes cost master
 - Re-purpose inpatient space

Holy Family Hosp. Transformation

25

Hospital	Physicians & NP/PA	Senior Leaders	Mission Focus	Recognition
2001: 90-bed hospital	2001: 35 employed providers	2001: 10 senior leaders	2001: Focus on the sick population	2001: Locally recognized
2012: 35-bed hospital	2012: 90 employed providers	2012: 5 senior leaders	2012: Focus on wellness & prevention	2012: Nationally recognized for safety, innovation and thought leadership

Clint MacKinney, MD, MS

Health Care Transformation

26

- How do we move toward delivering value when our revenue is primarily volume-driven?
- How do we not get “soaked” during the transition?
- We can “test the waters” with a new set of tools.

Clint MacKinney, MD, MS

Agenda

27

- Rural Health Context
- Transfer of Financial Risk
- Redefine and Redesign
- **Toolbox for Value**

Provider Toolbox

28

1. Fee-for-Service Attention
 2. Operations Efficiency
 3. Physician Engagement
- ✓ Patient-Centered Medical Homes
 - ✓ New Skill Development
 - ✓ Measure, Report, and Act
 - ✓ Performance Improvement
 - ✓ Payment for Quality
 - ✓ Care Coordination
 - ✓ Referral Patterns
 - ✓ Regionalization
 - ✓ Community Engagement

1. Get Your FFS House in Order

29

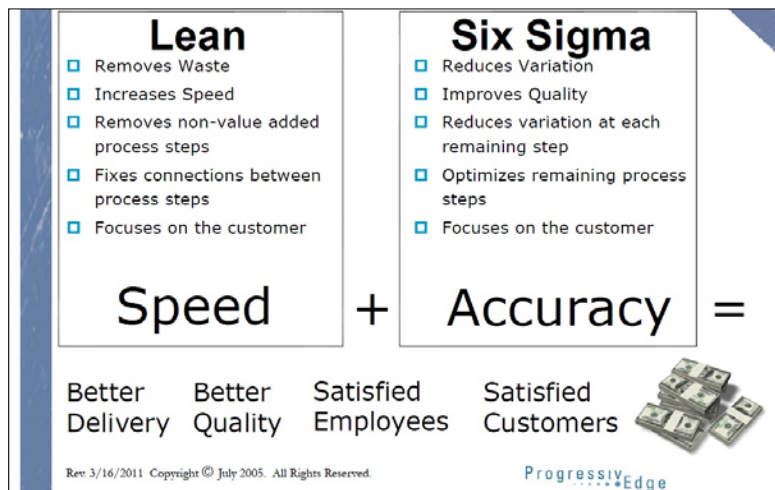

Attention to

- Market share
- Expense management
- Revenue cycle
- PQRS/Meaningful Use
- Payer/Purchasing contracts
- *Appropriate volumes*

2. Improve Operations Efficiency

30

Resource: Jay Arthur. *Lean Six Sigma for Hospitals: Simple Steps to Fast, Affordable, and Flawless Healthcare*. 2011

Medical Staff Relationships

31

The hospital CEO's most important job is developing and nurturing good medical staff relationships.

Source: Personal conversation with John Sheehan, CPA, MBA

Clint MacKinney, MD, MS

Physicians

32

- Physicians see themselves as independent autonomous, and in control!
 - The antithesis of team work?
- Yet, hospital-physician alignment is essential to delivering value
- Need physician leaders to devise new care models and create sustainability
- Primary care could potentially control large amounts of dollars, so...
 - $(\$5,000/\text{pt}/\text{yr} \times 2,000 \text{ pts}/\text{phys} \times 10 \text{ phys} = \$100 \text{ million}/\text{yr})$

Clint MacKinney, MD, MS

3. Engage Medical Staff *Deeply*

33

Physician* Engagement means

Active physician involvement and meaningful physician influence that moves the organization toward a shared vision and a successful future.

- Governance
- Compensation
- Education
- Data

* or Provider

Clint MacKinney, MD, MS

Shifting Health Care Payments

34

Clint MacKinney, MD, MS

√ Develop Medical Homes

35

Patient-centered medical homes are primary care practices that offer around-the-clock access to coordinated care and a team of providers that values patients' needs.

- Access and communication
- Coordination of care
- Patient and family involvement
- Clinical information systems
- Revised payment systems

See www.TransformMed.com

Sources: Commonwealth Fund and 2007 Joint Principles of Patient-Centered Medical Homes.

Clint MacKinney, MD, MS

Medical Home Quotes

36

- All team members practice at the top (optimum) of their license and experience
- Best evidence is the best and only way we deliver care
- Care is the same, regardless of the provider
- Continuous performance improvement of our care is rigorously driven by data
- There are no non-compliant patients, only those we have not reached
- An electronic health record is critical to managing patient and population health
- Let care protocols do (at least some of) the work (e.g., lab orders, med refills, vaccines)

Crete Physicians Clinic
Crete, Nebraska

Clint MacKinney, MD, MS

√ Cultivate New Skills

37

- New skills required
 - We are *comprehensivists*
 - Data analytics
 - Quality improvement
 - Cost management
 - Team management – “leader” need not be a physician
- But I don’t want to change!
 - Static fee-for-service prices – working harder for less
 - No bonuses – less pay for subpar quality
 - Volume at risk – from poor economy, high deductibles, and skilled competitors

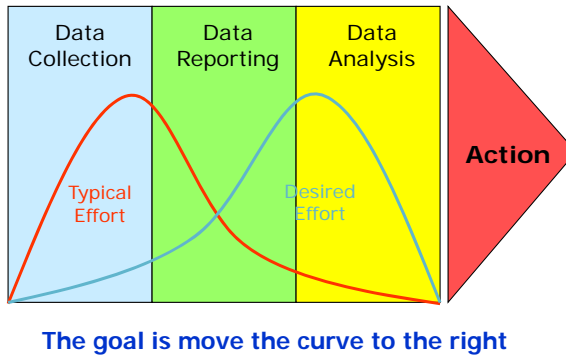

√ Measure, Report, and Act

38

- Measure and report performance
 - We attend to what we measure
 - *Attention* is the currency of leadership
- Tell the performance story
 - Data → information → insight
 - We are all “above average,” right?
 - Let the data set you free
- When possible, control the data
 - Market share – who’s leaving and why
 - Our costs to payers, and our competitor’s costs

Performance Measurement ROI

Source: Greg Wolf, Stroudwater Associates

Clint MacKinney, MD, MS

√ Prioritize Improvement

40

- Clinical quality, patient safety, and the patient experience
 - Expectation: "Always above the mean. Always improving."
- Leadership priority
 - Every meeting
 - Charts, not spreadsheets
 - Un-blind the data!
- Quality/safety performance
 - ACOs – 33 outpatient measures
 - Hospitals – Hospital Compare

Clint MacKinney, MD, MS

✓ Get Paid for Quality

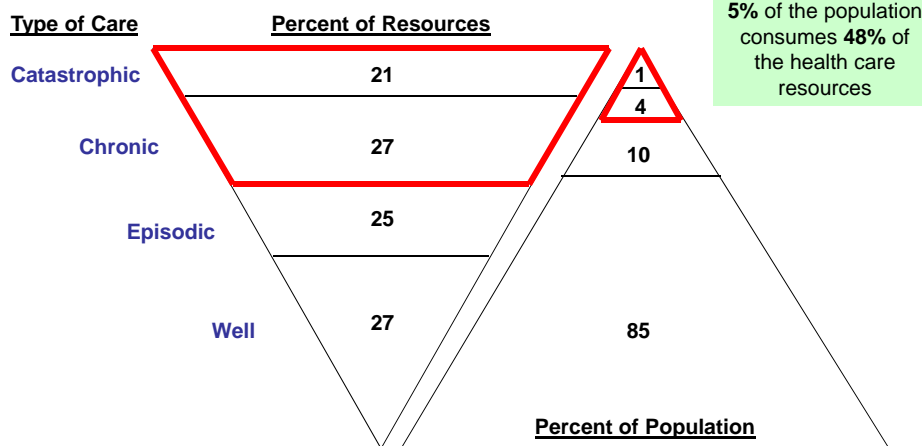

41

- Aggressively apply for value-based demonstrations and grants
- Negotiate with third party insurers to pay for quality
- Consider self-pay and employees first for care management
 - Direct care to lower cost areas with equal (or better) quality
 - Reduces Medicare cost dilution

Cost by Patient

42

Source: Rural Wisconsin Health Cooperative, 2003. Updated with Kaiser Family Foundation. *Health Care Costs: A Primer*. March 2009.

√ Coordinate Care

43

- Supports provider care plans
- Supports patients with frequent contact
- Helps patients prepare for office visits
- Identifies high-risk patients
- Develops disease registries
- Monitors reminder systems
- Provides patient education
- Coordinates care and transitions

√ Think About Your Referrals

44

- Develop a *Value* Referral Network
 - Who provides the best care for your patients?
 - Who provides the best value for your patients?
 - What quality of care do you want your mom to have?
- Tertiary care facilities and specialists should earn our trust and referrals
 - Our community and patients deserve it

✓ Consider Regionalization

45

- Act locally; think regionally
- Economies of scale may demand a contracted cottage industry
 - Yet, future payment linked to *local* covered lives
- Goal: to care for populations expertly, efficiently, equitably
 - Independence is not a mission statement
 - Affiliation is not an end in itself
 - But... options are optional!
 - Success measured by *clinical integration*

Resource: Lupica and Geffner. Enlightened Interdependence. *Trustee*. November/December 2012.

Clint MacKinney, MD, MS

Clinical Integration

46

- Clinical data sharing in real-time
- Standardized clinical care protocols
- Consistent clinical performance measures and reporting
- Clear team member responsibilities across multiple facilities
- Sense of professional camaraderie among disparate organizations
- Aligned incentives for regional *population health* improvement

Clint MacKinney, MD, MS

√ Engage Your Community

47

- What is available locally to improve health care **value**?
 - Public Health
 - Social Service
 - Agency on Aging
 - Community health workers
 - Care transition programs
 - Churches and foundations
- Do not duplicate!
 - Collaborations are less expensive than new clinic/hospital services – and build good will
- Do what's *right*

Clint MacKinney, MD, MS

RuralHealthValue.org

48

- Rural Health Value Project
 - Assess the rural implications of policies and demonstrations
 - Develop tools and resources to assist rural providers and communities
 - Inform and disseminate rural health care innovations
- Share an innovation with us that has moved your organization (or another) toward delivering value.
- Continue to be a leadership voice for rural health care value.
 - Our glass is at least half full. A positive attitude is infectious!
